HumiTime® ROOT Ⅰ

Description

HumiTime® ROOT I is exploited from weathered coal and produced by special equipment. It can be applied in all types of soil, such as alkaline, sandy, acid, saline soils and so on. It can be applied to soil alone or mixed with nitrogen, phosphorus and potassium or other fertilizers.It can improve the organic matter in the soil and improve the soil.

Specification(Typical analysis)

Appearance	Granular&Powder
Organic Matter	80% Min
Humic Acid	70% Min
Powder Mesh	60-120 Mesh
Granular Size	2mm-4mm
Moisture	25% Max

- High Organic Matter
- Suitable for bottom fertilizer
- Can be mixed with other fertilizers

Benefits

- Increases yield and improves the quality of plants.
- Improves the soil structure and increases the water retention capacity.
- Increases and stimulates beneficial microorganisms.
- Enhances the soil cation exchange capacity (CEC).
- Increases the efficiency of fertilizers and reduces nutrient leaching.
- Promotes root development. Increases nutrient uptake.
- Decreases stress due to drought and/or application of pesticides.
- Stimulates activities of soil microorganism
- Increases the germination of seeds and enhances development of root.

Application

Based Fertilizer: Broadcast application on the earth surface, then deep tillage about 10-15 cm before seeding, 80-300 kg/ha.

Top dressing: Apply it between the plant rows, 50-300 kg/ha.

* This recommendation may be varied according to the soil characteristics and local conditions.

Package: 20 kg Kraft bags with PE liner,
1 kg、5 kg、10 kg foil/PE bag, customized
Sealed well and store in cool and dry place.

Manufacturer & Distribution:Qingdao Future Group
Headquarter:Phoenix Plaza,Qingdao,China.
